

Creating solutions for climatic and environmental simulation

For more than 25 years Aralab has been perfecting ways to **create and control temperature, humidity, light** and other environmental conditions. All over the world we have become partners with laboratories, universities and research institutes that helped us develop the most complete and reliable climatic simulation equipment.

CLIMATIC CHAMBERS FOR PLANT GROWTH RESEARCH

Recreate temperature and humidity with exceptional precision and uniformity

Program day / night and dusk / dawn cycles with dimmable lighting system

Easily program all conditions through a friendly touch-screen controller

Retrieve, view and analyze all data with the FitoLog software suite

Choose the most convenient shelving and workspace options for an efficient use of the internal area

Rely on Aralab expertise and prompt support for any information or assistance

From small **reach-in** chambers to **walk-in** rooms, what drives us is simple: provide solutions that go beyond the expectations of users.

YOUR OWN CLIMATE

Our main goal

Let's meet!
