Job Description

Job Title:	Field Service Engineer
Job Locations:	Scotland, Greater Manchester County, Hertfordshire County
Department:	Service
Responsible to:	Service Management Team
Reporting to:	Service Field Manager

Established since 1947, LTE Scientific is a leading European manufacturer and supplier of laboratory and medical equipment, which is sold extensively into the public and private sectors, including Healthcare, Further Education, Pharmaceutical, Biotech, Research, Food/Beverage, Technology and Industrial.

LTE Specialises in the manufacture, supply and service/testing of medical and laboratory equipment including laboratory autoclaves, steam sterilizers, endoscope drying/storage and decontamination solutions plus a wide range of laboratory thermal equipment which includes ovens, incubators, cooled incubators, drying cabinets, freeze-dryers and environmental chambers/rooms for stability studies, shelf-life testing, BOD and large-scale incubation.

Our multi-purpose sterilization autoclaves and steam sterilizers for both the laboratory and medical industries are designed and built in the UK using durable stainless steel to achieve the high temperatures and pressures required for professional and efficient sterilization.

Role overview

We have an excellent opportunity to join our team of engineers.

We are looking for a motivated and enthusiastic Field Service Engineer. The ideal candidate must have the ability to troubleshoot, and fault find with the ability to work both on their own and as part of a team, be forward thinking and organized to complete jobs within timeframes, have a logical way of thinking and the ability to work away on occasion.

Key Responsibilities

- Autoclave Service and validation to the relevant HTM/UKAS standards.
- Breakdown and fault finding down to component level.
- Carry out activities on all of LTE's range of equipment and when required other manufacturers range.
